Live Draw: How to check draw result?

Each Draw Event has fixed time of draw.

- Player can see the live result right at the scheduled time of Draw Event
- To see the live draw happening:

One can see live draw of each Draw Event at

<https://thedrawzone.com>

- One can click on "Live Draw" option in MLP to visit the site and witness the Random Numbers generating right in front of him/her.
- Step 1 : The draw system generates a set of two-digit random numbers. This set contains 10 unique numbers.
Step 2 : The system randomly selects 5 unique numbers out of set of 10 numbers.
Step 3 : In the final step the system randomly selects the winning number of the draw event. The winning number is randomly picked by the system from the set of 5 numbers.
Each number is displayed in 2-digit format. The right-side digit (indicated as "R") and the left side digit (indicated as "L"). For example in the number 52, "5" is L and "2" is R.

Bid Categories

Each Category Contains Logically Grouped Numbers. Four types of bid Categories(Horizontal Coverage, vertical coverage, Zigzag coverage and exact match in MLP Jackpot Game). Five types of Bid Options. The details are as mentioned below:

CRA : Common Right Advantage

Horizontal Coverage as Single bid covers 10 horizontal numbers.

There are **100 options** in this category. Options are **01,02,03,.....,98,99,00** .

Players can choose a two - digit number out of these hundred options.

Player can win in two ways in this category:

- If the both digits of the number you choose match exactly with the drawn number, you win **10x** of the bid value
- If only the right - most digit of the number you choose matches with the rightmost digit of the drawn number then you win **10x** of the bid value.

Example :

If the CRA number chosen is **25** and the points assigned are **10 points** then if:

A: If the drawn number is **25** itself then a player wins **10 times** the points assigned. Thus, **10*10=100 points** are won.

B: If the number drawn is any number other than 25 whose "Right side" digit is **5** as in **05, 15, 35, 45, 55, 65, 75, 85, 95** then the player wins **10 times** the points assigned. Thus, **10*10=100 points** are won.

T-10 : TARGET-TEN

Vertical Coverage as Single bid Covers 10 Vertical numbers.

There are ten pre-defined Groups Containing 10 numbers each as Shown Below:

- First Group – T1 (01-10) contains numbers : 01,02, 03,.....,08,09,10;
- Second Group– T2 (11-20) contains numbers :11,12, 13,.....,18,19,20;
- Third Group – T3 (21-30) contains numbers : 21,22, 23,.....,28,29,30;
- Fourth Group – T4 (31-40) contains numbers : 31,32, 33,.....,38,39,40;
- Fifth Group – T5 (41-50) contains numbers : 41,42, 43,.....,48,49,50.
- Sixth Group– T6 (51-60) contains numbers : 51,52, 53,.....,58,59,60.
- Seventh Group – T7 (61-70) contains numbers : 61,62, 63,.....,68,69,70.
- Eighth Group – T8 (71- 80) contains numbers : 71,72, 73,.....,78,79,80.
- Ninth Group–T9 (81-90) contains numbers : 81,82, 83,.....,88,89,90.
- Tenth Group – T10 (91- 00) contains numbers : 91,92, 93,.....,98,99,00.

A Player can choose any T10 group. if the number drawn matches any one of the numbers in the chosen group, then the points Won are 10x times the assigned points.

Example: If Player chooses T-10-2 (11-20) and the points assigned at 10 then player wins 10 times ($10 \times 10 = 100$ points) if the number drawn is any one out of the following numbers: 11,12, 13,14,15,16,17,18,19,20.

T-20 : TARGET-20

Vertical Coverage as Single bid covers 2 Vertical lines of 10 numbers each (All Twenty numbers Covered).

There are five pre defined groups containing 20 numbers each as shown below.

- First Group – T1 (01-20) contains numbers : 01,02, 03,....,18,19,20;
- Second Group– T2 (21-40) contains numbers : 21,22, 23,....,38,39,40;
- Third Group – T3 (41-60) contains numbers : 41,42, 43,....,58,59,60;
- Fourth Group – T4 (61-80) contains numbers : 61,62, 63,....,78,79,80;
- Fifth Group – T5 (81-00) contains numbers : 81,82, 83,....,98,99,00.

A player can choose any T 20 group. If the number drawn matches any one of the numbers in the chosen group, then the points won are 5 times the assigned points.

Example:If player chooses T2 (21-40) and the points assigned at 10 then player wins 5 times ($10 \times 5 = 50$ points) if the number drawn is any one out of the following numbers:

21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39,40

DR (Digital Root):

Zigzag Coverage as Single bid covers 11 Zigzag Numbers

A digital root is a value obtained by a repetitive process of adding digits until a single digit number is reached.

Forexample:

- a) The digital root of **34** is **7**, because $3 + 4 = 7$.
- b) The digital root of **97** is **7**, because $9+7=16$ and $1+6 = 7$.

There are 10 digital roots possible. They are as under:

- DR(1) :01,10,19,28,37,46,55,64,73,82,91
- DR(2) :02,11,20,29,38,47,56,65,74,83,92
- DR(3) :03,12,21,30,39,48,57,66,75,84,93
- DR(4) :04,13,22,31,40,49,58,67,76,85,94
- DR(5) :05,14,23,32,41,50,59,68,77,86,95

- DR(6) :06,15,24,33,42,51,60,69,78,87,96
- DR(7) :07,16,25,34,43,52,61,70,79,88,97
- DR(8) :08,17,26,35,44,53,62,71,80,89,98
- DR(9&0) :09,18,27,36,45,54,63,72,81,90,99,00

Example#1: If the digital root of the number chosen is DR(7) and the points assigned are **10 points** then: The player will win **9 times** the points assigned if the number drawn is any of the numbers whose digital root is 7 i.e., any number out of the numbers **07,16,25,34,43,52,61,70,79,88,97.**

T-SHOT : TOPSHOT

Exact Match of Single bid Covers one Number.

There are 100 options in this category.

Options are 01,02,03,.....,98,99,00 .

Players can choose a two-digit number out of these 100 options.

Player wins in this category if the chosen number exactly matches with the drawn number. On winning the player gets 100x of the bid value.

Example :

If the T-SHOT number chosen is '25' and the points assigned are 10 points then if the drawn number is '25' itself then a player wins 100 times the points assigned. Thus, $10 \times 100 = 1000$ points are won.
